KEY FEATURES

A DECADE IN THE MAKING

The Avenue rides like a dream because that's exactly what it is – a dream come true. Pedego Chief Product Officer, Paul Auclair, had a vision for a low-price bike without compromises. One that was fast, lightweight, and practical for everyday use. After more than a decade of development and countless iterations, the Avenue is all of those things and much more...

IT FEELS GOOD

It's impossible to put into words how good it feels to ride the Avenue. You just have to ride one and see for yourself. It will completely change the way you think about cycling, opening up an all-new avenue for fun and adventure.

RANGE & POWER

The Avenue empowers you to go farther and faster. The state-of-the-art watt motor achieves an ideal balance between power and efficiency. The high-tech battery is both lightweight and long-lasting. Together, they set the standard for real-world performance.
